### Introduction

In Georgia, natural hazards, coupled with significant levels of exposure and vulnerability, have a substantial negative impact on the national economy and development. According to the Government, over the last 40 years, 70% of the territory of the country experienced natural hazards of hydrometeorological and geological origin; economic losses exceeded 14 billion USD.

In this context, the Government made a commitment to strengthen the disaster risk management system, improve preparedness and coping capacities on local and central levels, and ensure disaster risk reduction is integrated across development strategies, plans and frameworks, as noted in the official statement made by the Georgian delegation at the 4th Session of the Global Platform on Disaster Risk Reduction in May 2013<sup>1</sup>.

To achieve this, the Government of Georgia developed and approved the National Plan of Action for Capacity Development for Disaster Risk Reduction (DRR) in [month] 2015.

The National Plan has been developed on the basis of the recommendations for action of the Disaster Risk Reduction Capacity Assessment validated in September 2014 by the Government of Georgia.<sup>2</sup>

The capacity assessment and the development of the National Plan have been undertaken through a participatory and multi-stakeholder consultation process involving more than 60 governmental institutions, non-governmental organisations and international cooperation partners in Georgia spanning from February to December 2014.

The National Plan provides the basis for the alignment of existing and planned projects, programmes and initiatives carried out by various stakeholders in Georgia into a single comprehensive framework owned by the Government of Georgia. The National Plan also comprises a set of activities related to disaster risk reduction that require additional financing.

The format of the National Plan is that of a logical framework structured according to the Hyogo Framework for Action (HFA) Priorities for Action. The HFA is the internationally endorsed framework that guides Governments' efforts in risk reduction of which the Government of Georgia is a signatory.

The activities included in the National Plan take into consideration the country's real capacity to implement them from 2015 to 2019 (five years). For each activity, the National Plan outlines responsible organisations for their implementation and oversight, partner organisations, timeline, expected results, allocated resources (for ongoing activities) and required funding (for planned activities).

The National Plan comprises five main results areas, as follows:

- Priority for Action 1: Ensure that disaster risk reduction is a national and a local priority with a strong institutional basis for implementation. Capacity development activities under this pillar are focused on strengthening the national legislative and policy framework for DRR, and ensuring effective coordination and oversight of the implementation of the National Plan.
- Priority for Action 2: Identify, assess and monitor disaster risk and enhance early warning.Capacity development activities under this pillar target the development and adoption of a

<sup>&</sup>lt;sup>1</sup> Source: Official Statement of the Government of Georgia at the Fourth Session of the Global Platform for Disaster Risk Reduction, 19-23 May 2013, Geneva, available at: <a href="http://www.preventionweb.net/globalplatform/2013/programme/statements">http://www.preventionweb.net/globalplatform/2013/programme/statements</a>

<sup>&</sup>lt;sup>2</sup> The report is available at: http://police.ge/en/ministry/structure-and-offices/emergency-management-department?sub=7493

unified set of methodologies and tools for multi-hazard risk assessment, mapping and monitoring; the establishment of a centralized multi-hazard disaster risk information and knowledge system, consisting of national e-Library, databases, information systems and knowledge portal; implementation of a number of local-level detailed hazard mapping and risk assessment projects; and well-functioning Early Warning Systems.

- 3. Priority for Action 3: Use knowledge, innovation and education to build a culture of safety and resilience at all levels. Capacity development activities under this pillar are divided into three main clusters: (I) awareness-raising and training of decision makers, government officials, parliamentarians, local authorities, NGOs and the public; (II) integration of DRR into the formal education system at all levels (preschools, primary and secondary education system, graduate and postgraduate levels); and (III) research, development and innovation in risk reduction.
- 4. Priority for Action 4: Reduce the underlying risk factors. This pillar comprises activities related to sectorial or thematic projects, programmes and activities that address underlying risk factors, such as activities focused on reducing the risk from climate variability and change and climate change adaptation; reducing underlying risks in agriculture and livelihoods; environmental protection and natural resource management; spatial and urban planning; risk-informed construction norms and guidelines; addressing technological hazards; reducing risks in health sector. This pillar also comprises a set of activities related to integrating (or mainstreaming) disaster risk reduction in the regional development planning of Georgia.
- 5. Priority for Action 5: Strengthen disaster preparedness for effective response at all levels. Capacity development activities under this pillar are clustered in four main groups: (I) policies and institutional arrangements for efficient leadership and coordination for emergency preparedness and response; (II) capacities for emergency preparedness and response planning at national and local levels; (III) community-based preparedness for emergency response, including for educational facilities (schools and pre-schools); and (IV) development of methodology and training for post-disaster recovery and reconstruction.

Progress on the implementation of the National Plan will be regularly monitored, reported and communicated to all stakeholders. Annual revision and adjustment of the National Plan will be ensured, including for aligning it to the successor framework to the HFA which will be endorsed in Sendai in March 2016.

As of xxx 2015 [date of official approval], the total budget of the National Plan is xxx, with xxx already allocated for ongoing activities, and xxx required for implementation of agreed-upon priority actions.

#### Structure of the Plan

# Priority for Action 1. Ensure that disaster risk reduction is a national and a local priority with a strong institutional basis for implementation

- 1.1. Legislative framework
- 1.2. National DRR Strategy
- 1.3. Coordination and monitoring of the implementation of the National Plan of Action for DRR
- 1.4. Coordination mechanism for DRR
- 1.5. Resource mobilization for DRR

### Priority for Action 2. Identify, assess and monitor disaster risk and enhance early warning

- 2.1. Unified methodology and tools for multi-hazard risk assessment, mapping and monitoring
- 2.2. Centralized multi-hazard disaster risk information and knowledge system, consisting of national e-Library, databases, information systems and knowledge portal
- 2.3. Local-level detailed hazard mapping and risk assessment
- 2.4. Early Warning Systems, national and local, by hazard and sectors; and end-to-end multi-hazard nation-wide integrated early warning system

## Priority for Action 3. Use knowledge, innovation and education to build a culture of safety and resilience at all levels

## Awareness-raising and training of decision makers, government officials, parliamentarians, local authorities, NGOs and the public

- 3.1. Awareness-raising of decision makers at all levels
- 3.2. Regular training for technical staff
- 3.3. Community-based awareness raising
- 3.4. Non-formal education, youth networking and participation in DRR initiatives
- 3.5. Sensitization of the media

#### Formal education system at all levels

- 3.6. DRR curriculum for preschools, and primary and secondary education system
- 3.7. DRR curriculum for the graduate and postgraduate levels
- 3.8. Training of teachers and school principals

#### Research, development and innovation

3.9. Research initiatives for disaster risk reduction

#### Priority for Action 4. Reduce the underlying risk factors

- 4.1. Mainstreaming DRR in regional development planning
- 4.2. Climate change adaptation
- 4.3. Reducing underlying risks in agriculture and livelihoods
- 4.4. Environment protection and natural resource management
- 4.5. Spatial/ urban planning and risk-informed construction
- 4.6. Technological hazards
- 4.7. Reducing risks in health sector
- 4.8. Social protection

#### Priority for Action 5. Strengthen disaster preparedness for effective response at all levels

## Policies and institutional arrangements for efficient leadership and coordination for emergency preparedness and response

- 5.1. Institutional reform
- 5.2. Development of the National Emergency Preparedness and Response (Civil Protection) Plan
- 5.3. Coordination for effective disaster preparedness and response and introduction of international response coordination mechanisms
- 5.4. Joining international Mechanisms and standards for Emergency Response

#### Capacities for emergency preparedness and response

- 5.5. National and local level emergency preparedness and response planning
- 5.6. Logistics and communication services

#### Community-based preparedness for emergency response

- 5.7. Disaster preparedness for effective emergency response at the community level
- 5.8. School/ pre-school based disaster preparedness

### Post-disaster recovery and reconstruction

5.9. Development of unified post-disaster damage and recovery needs assessment methodology, and training

### National Plan of Action for Capacity Development in Disaster Risk Reduction

Results	Activities	Lead institution(s)	Partner institutions(s)	2015	2016	2017	2018	2019	Resources required (GEL)	Resources allocated (GEL)
Priority for Action 1. Ensure tha	t disaster risk reduction is a national and a local p	riority with a str	ong institutional k	oasis for	implem	entation				
1.1. Legislative framework	Activity 1.1.1.  Based on the new Law on "Civil Safety" (Art.56), develop and enforce series of normative acts which will regulate the matters related to reducing and mitigating risks arising from natural and man-made hazards.	EMD/EMA >>> Do you require assistance (i.e. technical; consultancy)?	Government institutions and other key DRR stakeholders	х	х				N/A or xxx GEL	N/A or xxx GEL
	Activity 1.1.2. Ensure the legislative and institutional reform on disaster management and prevention is approximated/ harmonized with EU directives and international standards: - Support development and implementation of a national roadmap for translating relevant provisions of the EU acquis and best practices related to the prevention and management of disasters (e.g. EU Floods Directive, EU Civil Protection policies) into the national legislation or regulatory framework; - Capacity building for the implementation of the EU floods Directive and for addressing floods prevention; - Provision of support/technical expertise for the improvement of legislative framework and inter-institutional arrangements, taking into account the recommendations of the PPRD East programme, phase I). (PPRD East Programme, phase II)	EMD/EMA SSCMC	PPRD East	X	X	X	X			Budget details for Georgia are not available
1.2. National DRR Strategy	Activity 1.2.1.  Develop a National DRR Strategy in line with the National Threat Assessment Document:  - Establish a multi-sectorial working groups to develop the Strategy based on consultative	SSCMC	All DRR stakeholders in Georgia	Х	Х				xxx GEL	Technical assistance (UNDP)

Results	Activities	Lead institution(s)	Partner institutions(s)	2015	2016	2017	2018	2019	Resources required (GEL)	Resources allocated (GEL)
	process with all stakeholders in DRR.  Provide required technical expertise for the development of the Strategy in line with best practice and international standards.  Organize national workshop(s) for the validation/ endorsement of the Policy and Strategy.  Align the DRR Strategy and National Plan of Action for DRR with other existing relevant policies, strategies and plans.									
1.3. National Plan of Action for DRR	Activity 1.3.1.  Ensure the coordination of the implementation of the National Plan of Action for DRR by SSCMC (the actual implementation of various activities is the responsibility of the lead and partner institutions listed in the National Plan).  Activity 1.3.2.  Convene bi-annual multi-stakeholder meetings to assess progress in implementation, and propose corrective measures for potential challenges.  Activity 1.3.3.  Set up a mechanism for regular monitoring, annual revision and update and mid-term review of the National Plan on the basis of regular assessment of progress in DRR (e.g. national HFA reports).  Activity 1.3.4. Ensure proper national reporting on the HFA (and post-2015 agreement) implementation progress based on a consultative process with all DRR stakeholders in line with reporting requirements and timeline. <sup>3</sup>	SSCMC	All DRR stakeholders in Georgia UNDP	X	X	X	X	X	Multi- stakeholder meetings 5,000 GEL	Technical assistance (UNDP)

<sup>&</sup>lt;sup>3</sup> The implementation of the National Plan for DRR contributes to achieving the commitments of Georgia as a signatory of the HFA (and post-2015 agreement).

Results	Activities	Lead institution(s)	Partner institutions(s)	2015	2016	2017	2018	2019	Resources required (GEL)	Resources allocated (GEL)
	Activity 1.3.5. Once the DRR Strategy are approved, adjust the National Plan as appropriate.								,	
1.4. Coordination mechanism for DRR	Activity 1.4.1. Initiate institutionalization of national coordination mechanism for Disaster Risk Reduction, with clear definition of mandate, responsibilities, mode of work, procedures, and administrative systems; ensure allocation of resources to support dedicated secretariat for national coordination mechanism.	SSCMC	Government of Georgia, related line ministries, UN agencies, Red Cross Movement, INGOs, civil society, scientific institutions, ocal authorities, mass media, other stakeholders in DRR	×	×				xxx GEL	
1.5. Resource mobilization for DRR	Activity 1.5.1. Conduct a resource mapping exercise in order to identify the DRR funding opportunities, and undertake resource mobilization efforts from the State budget as well as the international donor community.
