

2024 ANNUAL REPORT

The Capacity for Disaster Reduction Initiative (CADRI) is a global partnership committed to leaving no one behind and achieving the 2030 Agenda by strengthening countries' capacities to reduce disaster and climate risks.

Foreword

2024 marked a consolidation of CADRI's achievements and a turning point as the Partnership prepared for its next chapter.

The Partnership extended support to the Government of Djibouti in completing a comprehensive diagnosis of its disaster risk reduction (DRR) landscape and, throughout the year, worked with the Governments of Costa Rica, Ghana, Mongolia, and Madagascar to validate and apply findings from earlier diagnoses to inform national resilience-building efforts. In Zambia, CADRI worked to consolidate the outcomes of past missions to sustain momentum in capacity-building efforts.

As the Partnership approached the conclusion of its Joint Programme cycle (2019–2024), partners prepared for a new phase of operations focused on a nationally-led approach in the world's most vulnerable countries. The Joint Programme was extended until March 2025 to enable resource mobilization for this transition.

The CADRI Partnership prioritized documenting its transformative impact of the past five years in countries such as Bolivia, Costa Rica, Kyrgyz Republic, Tanzania, and Togo. This effort provided valuable insights into CADRI's role in strengthening collaboration between governments and the UN System, fostering multi-sector partnerships, deepening institutional awareness of DRR and climate change adaptation, and driving the development or revision of national policies, plans, and strategies. These achievements underscore CADRI's enduring contribution to strengthening national systems, as well as the continued relevance of CADRI's tools, methodologies, and collaborative approaches to advancing resilience.

Following on the recommendations of the Joint Programme Mid-Term Review, CADRI partners prepared the transition to a decentralized business model giving a stronger leadership role to UN Country Teams, with the gradual phase out of CADRI Global Secretariat functions being considered for 2025.

While administratively extended until 31 December 2025, this transition signals the conclusion of the CADRI Partnership 2019-2025 Joint Programme. It serves as an invitation to reimagine the ways in which we collaborate to tackle disaster and climate risk. We thank all our partners for their unwavering dedication throughout this journey. Together, we will carry forward the lessons and legacy of 15+ years of CADRI's capacity development work and commit to sustain this spirit of inter-agency collaboration.

Djibouti:

Assessing Capacities for DRR and CCA

In response to a request from the Government of Djibouti to support a review of national capacities to understand and manage disaster risks, the CADRI Partners conducted a scoping mission in January 2024 to build consensus on priority areas and socio-economic sectors amongst national stakeholders.

This laid the foundation for a comprehensive capacity diagnosis in May 2024, which involved 28 experts from national institutions and CADRI partners. The validation of the diagnosis' findings and recommendations is expected in 2025.

Scoping Mission
January 2024
Organizations: CADRI Secretariat, FAO, IOM, OCHA

Capacity Diagnosis Mission
May 2024
Number of Experts: 28
Organizations: CADRI Secretariat, FAO, IOM, OCHA, UNDP, UNDAC, UNDRR, UNHCR, UNICEF, WFP, WHO

The scoping mission, held from 22 – 24 January, brought together experts from FAO, IOM and OCHA regional offices and the CADRI Secretariat, who held consultations with 37 entities – including 16 government institutions, three civil society groups, three NGOs, three bilateral cooperation partners and 12 UN Country Team (UNCT) agencies. The scoping mission recommended prioritizing six highly vulnerable sectors: Water, Sanitation, and Hygiene (WASH), Food and Nutritional Security, Environment, Infrastructure, Human Mobility, and Health.

During the capacity diagnosis from 12 – 23 May, 28 experts from the government, the UNCT (FAO, IOM, UNDP, UNDRR, UNHCR, UNICEF, WFP and WHO) and regional and international experts deployed by FAO, IOM and UNDAC, conducted a review of Djibouti's national and local systems for managing climate and disaster risks in key socio-economic sectors.

During the mission, consultations were held with 22 central institutions, 39 local institutions, 16 multi- and bilateral partners, and three civil society organizations, ensuring a broad and inclusive consultative process. The mission covered Djibouti City and the regions of Tadjourah, Obock, Dikhil, Ali Sabieh, and Arta. It culminated in a workshop where preliminary findings were presented and discussed, paving the way to align these findings with the review of Djibouti's national disaster risk reduction (DRR) strategy, in line with the Sendai Framework for DRR 2015–2030, and the implementation of the Early Warnings for All (EW4All) Initiative.

A [testimonial video](#) captures the collaborative efforts and highlights contributions from key stakeholders committed to building Djibouti's disaster resilience.

CONTINUING THE JOURNEY

ADVANCING THE DRR AGENDA BY BUILDING ON CADRI CAPACITY DEVELOPMENT SERVICES

Processes that were initiated in 2023 or before and continued into 2024 include engagements in Mongolia, Costa Rica, Ghana, Madagascar, and Zambia.

Mongolia

Following the capacity diagnosis mission undertaken in September 2023, under the leadership of the National Emergency Management Agency (NEMA) which involved over 100 national officials and 120 local stakeholders, the findings and recommendations were consolidated in a report and summarized in a policymaker's digest in English and Mongolian.

On 9 December, the main findings and recommendations were validated by the National Council on DRR (NCDRR) held at the State Palace in Ulaanbaatar. Chaired by Deputy Prime Minister H.E. Mr. S. Amarsaikhan, the meeting brought together government ministers, local authorities, and NGOs.

Policy and operational recommendations to enhance disaster preparedness, early warning, and risk reduction will inform legal and policy reforms and help operationalize Mongolia's next mid-term strategy for implementing the Sendai Framework for DRR (2026–2030). NCDRR members will monitor progress in implementation on a monthly basis.

The Government of Mongolia commended the CADRI Partnership support at the Asia-Pacific Ministerial Conference on Disaster Risk Reduction in Manila, in October 2024.

The Capacity diagnosis report and Policymaker's Digests are available in English and Mongolian on the [CADRI website](#) under the 'Media Hub/Publications' section. You can also read more about CADRI's engagement in Mongolia through the dedicated story available on Medium [here](#).

Costa Rica

On 26 June 2024, the main findings and recommendations from the capacity diagnosis conducted in September 2023 were validated by the National Commission for Risk Prevention and Emergency Response (CNE) of Costa Rica in collaboration with the UN Resident Coordinator's Office (RCO). This diagnosis mission had been customized to the Government request using the [CADRI Digital Tool](#) to focus on the national recovery system, involving 15 experts and over 140 representatives from national and local institutions.

Following the validation, these recommendations have laid the groundwork for the development of a national framework for disaster recovery, supported the operationalization of the recovery subsystem of the National Risk Management Policy (2016–2030), enhanced the harmonization of UN agency efforts around the National Recovery Plan, and helped optimize and leverage existing investments. In October 2024, stakeholders involved in the mission provided overwhelmingly positive feedback on the quality of CADRI's services, with the outcomes of the capacity diagnosis being considered extremely relevant, useful, and practical.

The capacity diagnosis report for Costa Rica is available on the [CADRI website](#) under the 'Media Hub/Publications' section, or can be downloaded directly using this [link](#).

Photo: UNDP/Mongolia

Photo: UNDP/Costa Rica

Photo: UNDP/Ghana

Ghana

On 13 August 2024, the findings and recommendations of Ghana's capacity diagnosis were validated under the leadership of the National Disaster Management Organization (NADMO), with support from the UNCT, RCO, and the CADRI Partnership. The validation exercise reinforced national ownership and ensured alignment with Ghana's broader resilience-building agenda.

The next steps for the Government include developing an implementation and capacity development plan, integrating the recommendations into the National DRR Strategy and Action Plan, and harmonizing recommendations with international and national development frameworks.

The capacity diagnosis report stems from a government request in June 2022 for CADRI's support in strengthening Ghana's National DRR Strategy, building capacities for DRR and CCA, and creating a multi-hazard contingency plan. The diagnosis mission, led by NADMO, engaged 37 experts and consulted over 80 stakeholders. It provided a comprehensive analysis of Ghana's DRR and CCA capabilities, emphasizing governance, coordination, and critical sectors such as agriculture, energy, water and sanitation, and social protection.

The capacity diagnosis report and policymaker's digest for Ghana are available in English on the [CADRI website](#) under the 'Media Hub/Publications' Section. You can also read more about CADRI's engagement in Ghana through the dedicated story available on [Medium here](#)

Photo: FAO/Vofantiana Raharinaivo

Madagascar

On 12 December 2024, Madagascar's *Bureau National de Gestion des Risques et des Catastrophes* (BNGRC) led the validation of the findings and recommendations of the capacity diagnosis mission to stimulate dialogue around priority actions to strengthen resilience and explore resource mobilization opportunities to implement priority recommendations.

Organized by UNDP Madagascar, the validation workshop was attended by around 50 representatives from government bodies, UN agencies, NGOs, and the private sector, who worked in thematic groups to review the capacity diagnosis findings and recommendations. The BNGRC and *Cellule de Prevention et de la Gestion des Urgences* (CPGU) will incorporate the inputs provided by sectoral experts. The final output will serve as an essential resource for monitoring the implementation of Madagascar's National DRR Strategy, assessing progress in achieving the Sendai Framework for DRR, and guiding resource mobilization for DRR.

The capacity diagnosis report and policymaker's digest for Madagascar will be made publicly available in early-2025. You can read more about CADRI's engagement in Madagascar through the dedicated story available on [Medium here](#).

Photo: UNDP Climate/Zambia

Zambia

A national consultant recruited by the CADRI Secretariat consolidated the findings and recommendations from the capacity diagnosis held in October 2023 with the deployment of 27 experts and the engagement of 32 national and local institutions across sectors.

The diagnosis aims to support the implementation of Zambia's 8th National Development Plan and the United Nations Sustainable Development Cooperation Framework (UNSDCF) 2023–2027. A policymaker's digest is expected to be prepared in early-2025, after which a timeline for the validation of the report's findings and recommendations will be agreed.

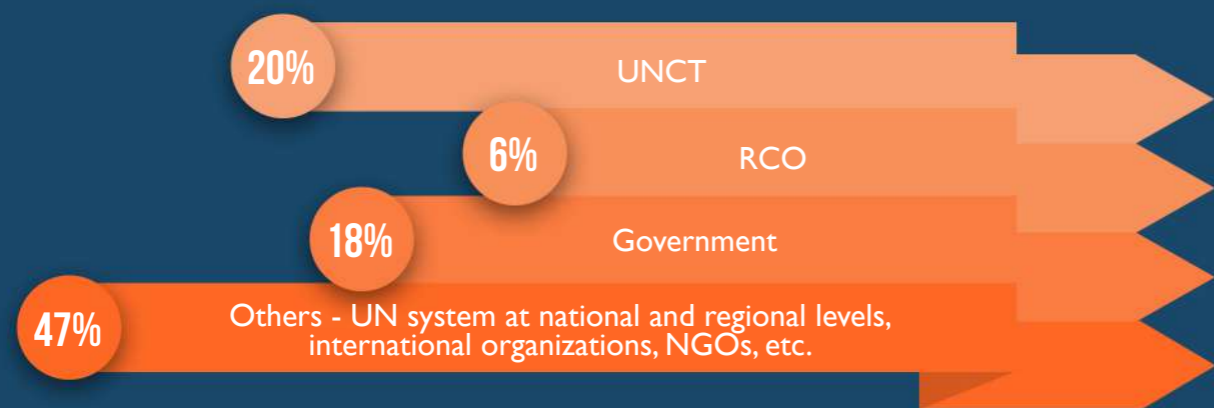

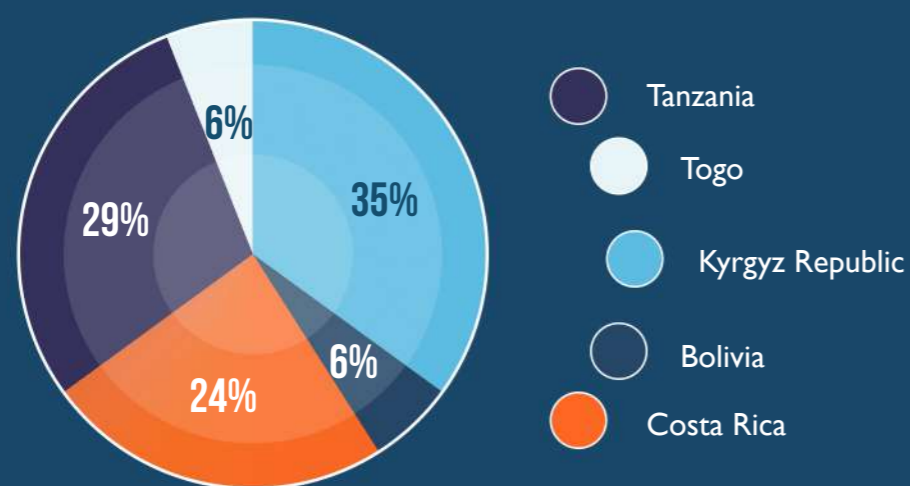

Photo: FAO/Volantiana Raharinaivo

OUR IMPACT

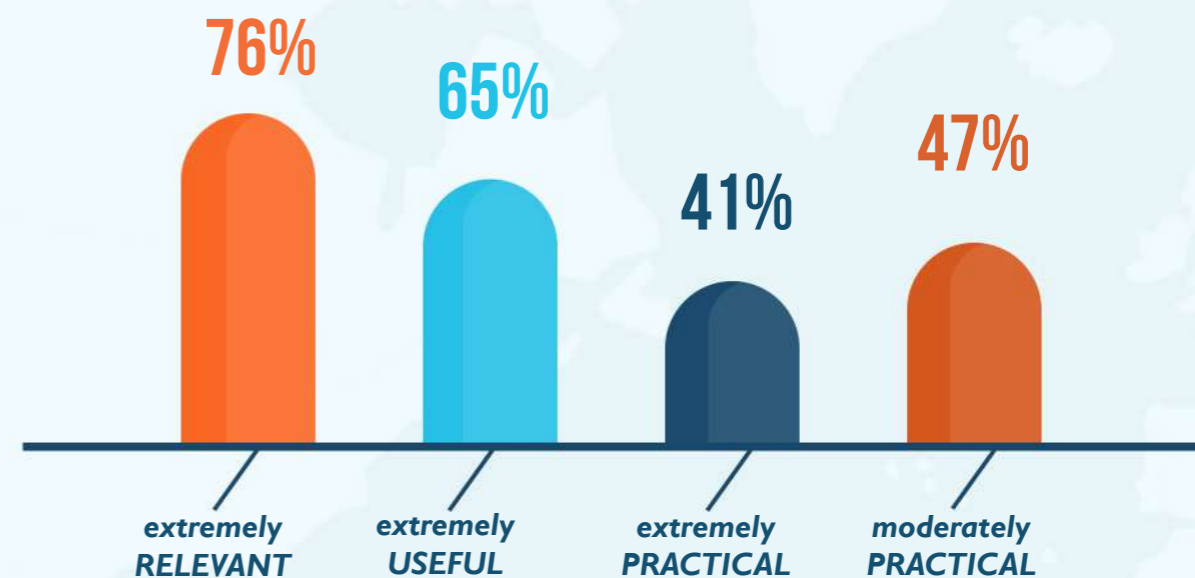

This year, the CADRI Partnership took a significant step to strengthen its monitoring and evaluation mechanisms, aiming to better understand the medium-term impact of its services. A comprehensive impact survey was developed in August 2024 and initially distributed to focal points in five countries that had implemented CADRI services and validated outputs within the past five years, gathering 17 responses. To ensure broad accessibility and inclusivity, the survey was made available in English, French, and Spanish.

At the end of 2024, the distribution list was expanded to include all stakeholders involved in capacity diagnosis missions in these countries. The survey remains open, with additional responses anticipated in early 2025, paving the way for a more thorough analysis of the value of CADRI services and CADRI's contributions to national processes and international goals.

Impact survey responses by country and institution:

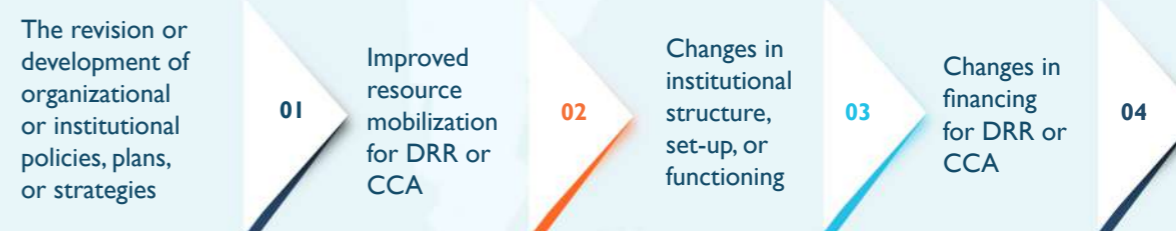

CADRI services were considered:
(% of responses)

The CADRI capacity diagnosis process was identified as having a **SIGNIFICANT INFLUENCE** in terms of:

And a **MODERATE INFLUENCE** in terms of:

COUNTRY-SPECIFIC IMPACTS

The Kyrgyz Republic

UNICEF Regional Office for Europe and Central Asia

“CADRI’s role is not just about assessing risks; it’s about building resilience from the ground up. CADRI’s work in the Kyrgyz Republic was a true partnership effort, with each agency bringing their sector-specific expertise to the table. This joint approach ensured that all sectors, including health, education, and social protection, were addressed holistically”

UNICEF Kyrgyzstan

“The CADRI process not only influenced our work in social protection but strengthened our partnerships across the UN System and with Government line ministries. We now have a clearer roadmap for building resilience through joint programming”

UNDP Kyrgyzstan

“My experience with CADRI has been extremely positive and valuable in promoting disaster resilience in Kyrgyzstan. Their multi-sectoral approach provided a clear picture of how risks intersect in sectors such as health and agriculture, which strengthened our DRR strategies”

Photo: UNDP Kyrgyzstan/Mavliuda Khodzhaeva

CADRI Services were rated as having the most significant influence on:

- ◆ The revision or development of local or national policies, plans, or strategies
- ◆ Collaboration between the government and UN System
- ◆ Strengthened partnerships with other stakeholders

OUR OUTREACH

Despite limited coordination capacity within the global Secretariat, the CADRI Partnership made notable progress in showcasing its value to a broader audience beyond existing partners.

Social Media

In July 2024, the Partnership expanded its social media presence to increase visibility, engage a broader audience, and amplify the impact of its messaging.

The CADRI Partnership, is now active on:

The social media links are presented as a vertical list of four items. Each item consists of a platform icon on the left, a white banner with the handle and platform name in the middle, and a QR code on the right. A thin white line connects the banner to the QR code.

YouTube

Storytelling

Since October 2024, CADRI has prioritized storytelling to distill lengthy capacity diagnosis reports into digestible highlights. The Partnership has published several stories on the Medium platform, strategically aligning them with UN international days to enhance their relevance, focus, and impact while boosting readership.

You can read stories published for UNDRR's International Day of Disaster Risk Reduction (IDDRR) and UNICEF's World Children's Day here:

The story cards are arranged vertically. Each card features a small image on the left and a title on the right. The titles are underlined and in blue text.

You can also read stories on CADRI's country engagements in Madagascar and Mongolia here:

The CADRI Tool

Scan the QR code to access the Tool

In 2024, 92 users registered for the CADRI Tool for capacity diagnosis, sector-specific analysis and planning, totalling 566 registrations as of 31 December 2024. In May, the capacity diagnosis mission in Djibouti was facilitated by the CADRI Tool, supporting the assessment of existing capacities, gaps and challenges at national and local level according to the four priority areas of the Sendai Framework for DRR.

The CADRI E-Catalogue

Scan the QR code to access the E-Catalogue

The CADRI E-Catalogue is a repository of training modules from partner agencies on core topics including risk information, risk governance, and disaster preparedness. This year, 18 new modules were added from FAO, RedR Australia, UNDP, and UNDRR.

CADRI at HNPW 2024

In May 2024, the CADRI Partnership held a hybrid event at the Humanitarian Network and Partnerships Week (HNPW) in Geneva which emphasized the transformative potential of CADRI's new business model with a renewed focus on UNCTs leadership role through RCOs enabling locally driven support.

The event, attended by over 60 representatives from governments, UN agencies, and civil society organizations, featured a panel of experts from FAO, GNDR, IFRC, IOM, UNDP, UNDRR, and WHO.

The session underscored CADRI's strategic role in boosting global resilience through partnerships, innovation, and a deepened focus on local leadership and community engagement.

Insights from Panelists

Dr. Abhilash Panda (UNDRR) highlighted CADRI's alignment with the Sendai Framework for DRR, showcasing its unique ability to mobilize and unite diverse technical expertise to support effective DRR and CCA implementation.

Dunja Dujanovic (FAO) called for aligning CADRI's outreach with global initiatives such as the Santiago Network, Early Warnings for All, and the Risk-informed Early Action Partnership, fostering integration across humanitarian, development, peacebuilding, and climate domains.

Jonathan Stone (IFRC) emphasized collaboration and continuity in DRR, advocating for synergies with emerging initiatives and for CADRI to continue to work closely with governments to co-deliver results.

Dr. Qudsia Huda (WHO) highlighted the integration of health into DRR strategies, citing Tanzania as an example where CADRI assessments bolstered the Universal Health Preparedness Review.

Andrew Knight (GNDR) stressed the inclusion of local communities and civil society in DRR and CCA efforts. He urged CADRI to empower local governments to enhance grassroots implementation.

FINANCIAL REPORTING FOR 2024

Pooled Fund

In 2024, FAO and IOM met their annual commitment to the inter-agency pooled fund which enabled the hiring of a Junior Programme Coordinator, the technical support and maintenance of digital platforms (including website hosting and the CADRITool), and the hiring of consultants to support country-level work.

In-Kind Contributions

Deployment of Expertise to Country

Engagements

The Partnership's success at the national level relies on partner agencies' in-kind contributions, particularly the deployment of expert staff for scoping and capacity diagnosis missions. In 2024, 28 experts from global, regional, and national levels were deployed by CADRI partners to support CADRI country work. CADRI partners also provided leadership and advisory support to in-country follow up activities such as implementing CADRI recommendations, organizing report validation workshops (e.g. UNDP in Madagascar), and translating reports into local languages (e.g. UNDRR in Mongolia). These CADRI Partners in-kind contributions remain essential to the Partnership's operations.

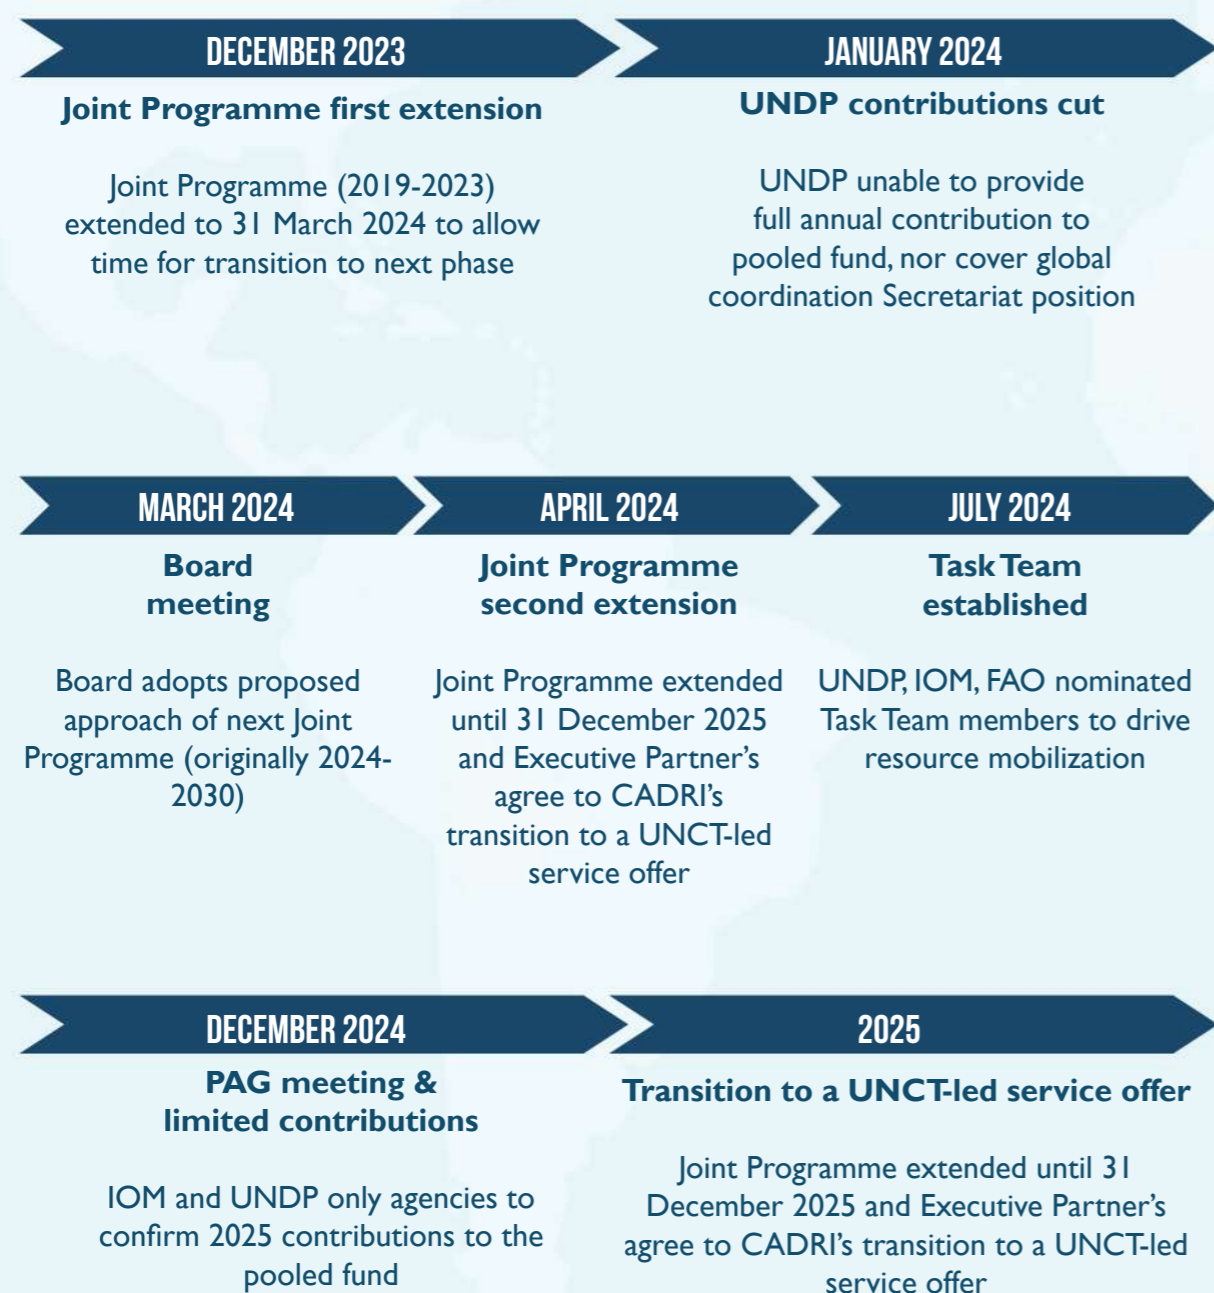

2024 Secretariat Budget

CADRI Secretariat Budget Allocation 2024	
Contributions to the Pooled Fund (USD)	
Partner	Amount
FAO	80,000
IOM	80,000
UNDP	45,000
Rolled Over from 2023	
Source	Amount
Pooled funds	35,000

Financial Report Summary 2024	
As of 31 December 2024, the CADRI Secretariat had spent 74.22 % of the approved budget	
Approved Budget	240,000
Delivery	178,129
Balance	61,871

SHIFTING STRATEGY FOR THE PARTNERSHIP

“We need CADRI, but with a new implementation modality with more responsibility from all partner agencies” – Respondent of the 2024 Impact Survey

Planning the Next Phase

Following a mid-term review and extensive consultations in 2022, the CADRI Board established a working group in mid-2023 to conceptualize the next phase of the Partnership. The proposed business model emphasizes a decentralized, UNCT-led approach aligned with the UNSDCF

To allow time for exploring the feasibility of sustaining a coordination function at the global and/or regional level—given the CADRI Partners' constraints in meeting annual commitments to the inter-agency pooled fund—the Joint Programme was extended until 31 March 2025. In early 2025, the Joint Programme was further extended until 31 December 2025, while partners advance the transition to a UNCT-led model and continue to consider the possible phase-out of the Global Secretariat function.

Mobilizing Resources for 2025–2030

To sustain the next phase, the CADRI Secretariat aimed to raise USD 7.2 million over six years to support operations and services in up to six priority countries annually. In 2024, the Secretariat focused on consolidating existing country engagements and mobilizing resources to implement the next phase, forming a Task Team to engage donors; however, resource mobilization efforts in 2024 were unsuccessful.

Our Secretariat

The CADRI Partnership welcomes a renewed inter-agency secretariat team dedicated to implement a smooth transition to the new CADRI Business model.
